

# Tecom<sup>®</sup> just makes sense with these Challenger<sup>®</sup> and Security Commander kits.

These kits provide just one more reason why Tecom is the right choice for your security solution.

Challenger series intrusion & access control security solutions continue to evolve with the changing landscape of the security industry in Australia and New Zealand. Built on the strong foundations of the previous panels, the new breed of Challenger panels gives users more flexibility and scale than ever before. Experienced users and installers will easily transition to the Challenger10 panel.

Security Commander continues to prove its value as a leading security software platform for your security requirements. As a robust and easy-to-use platform, it makes the perfect accompaniment to your Challenger system.
